

Selectivity and Promiscuity in Biomolecular Interactions

Coordinated by **Prof. Snezana Djordjevic**

On **Wednesdays** from **1-2pm** in the **JZ Young Lecture Theatre, UCL Anatomy Building**

Please note that the talks will be **IN PERSON ONLY**, everyone is welcome and encouraged to attend. For those of you who can't be there but wish to hear the talks, we will record them and make them available upon request for two weeks after the seminar.

26th April 2023	<i>Targeting I-Motif DNA – How Possible is Selectivity?</i> Dr. Zoe Waller, UCL School of Pharmacy, UK
10th May 2023	<i>Advances in High-Speed AFM methods to observe dynamics of single molecules</i> Dr. George Heath, University of Leeds School of Physics and Astronomy, UK
17th May 2023	<i>Metagenomic enzyme discovery: Widening substrate scope, narrowing product specificity</i> Dr. Jack Jeffries, UCL Biochemical Engineering Department, UK
24th May 2023	<i>Control mechanisms of HER/ERBB Receptor Tyrosine Kinase Signalling</i> Prof. Natalia Jura, University of San Francisco Cardiovascular Research Institute, USA
31st May 2023	<i>Evolution of the receptor binding in SARS-CoV-2 spike</i> Dr. Antoni Wrobel, The Francis Crick Institute, UK
15th June 2023	<i>Malaria parasite egress from the host red blood cell: a tale of PKG, proteases and puzzles</i> Dr. Michael Blackman, The Francis Crick Institute, UK
